DETAILED ACTION

General Status

1. This is a First Action on the Merits. Claims 1 - 8 are pending in the case and are being examined.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP 8 608 05(a)

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.

Application/Control Number: 10/634,720 Page 3

Art Unit: 2832

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 – 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 3, recites "especially for ...", makes the claim vague and indefinite.

Claim 4 recites the limitation "the support structure" in lines 1-3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 2832

6. Claims 1 – 3, 5 – 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kidd et al. [US 4,638,131] in view of Benjamin Rush [GB 2, 353, 762].

Kidd et al. disclose a multifunctional pushbutton switch with a plurality of pushbutton switching units [60] that have pushbutton surfaces located close to each other in a shared operating surface, comprising:

- a shared switch housing [34] in which the actuation tappets [80]
 of the pushbutton switching units are movably guided;
- a cap [56] mounted over the actuation tappets, the cap having
 rigid frame [58] with recessed windows [68], each corresponding
 to the shape and size of the pushbutton.

Regarding Claim 1, Kidd et al. disclose the instant claimed invention except for a membrane. Benjamin Rush [Figures 1 and 2] discloses a pushbutton switch with a cap, the cap made from a flexible silicone membrane [23]. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a flexible membrane on the top of the rigid frame of Kidd et al., as suggested by Benjamin Rush, in order to prevent dirt from contaminating the interior of the switch.

With regard the limitation "two-component injection molding technique" this is a process step limitation in an article claim and does not carry patentable weight, unless the process step limitation results in a materially different article.

Regarding Claim 2, the shape of the support structure is a matter of design choice and will depend on design parameters, such as, shape and layout of push-buttons.

Regarding Claim 3, since the resilience of switch membrane [26] of Kidd et al. presses away from the circuit board [20], for the pushbutton switch of Kidd et al. as modified by Benjamin Rush, the actuation tappets are resiliently pressed against the inner surface of the silicon membrane.

Regarding Claim 5, generally convex shape is disclosed for the operating surface [Kidd et al., Figure 5].

Regarding Claim 6, Benjamin Rush teaches use of convex or divot (concave) surface for the tappet [GB page 5, lines 15-18].

Regarding Claims 7 and 8, it would have been obvious to provide adhesive or bonding material between the resilient membrane and the support structure, so as to seal the joint between the resilient membrane and the support structure. Kidd et al. already disclose side flanges, and therefore, it would have been obvious to provide the resilient membrane over the side flanges thereby providing silicon membrane behind the outer circumference of the plastic frame.

Allowable Subject Matter

7. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hashiba [US 5,630,617], Davis [US 5,542,694], Miyako et al. [US

6,624,365], Kobayashi et al. [US 6,225,578], Kawase [US 5,689,095], Mitsuhashi et al. [US 4,766,271], Nakayama et al. [US 4,975,547], and Simpson et al, [Us 5,855,392] all disclose switch mechanisms. Applicant also should consider these references in response to this office action. Should issue arise concerning the rejection presented above, these references may be relied upon in a subsequent action to support the lack of novelty or obviousness of claimed subject matter to one of ordinary skill in the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marina Fishman whose telephone number is 571-272-1991. The examiner can normally be reached on 7-5 M-T.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad can be reached on 571-272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
